

## SIP – RO 2023

- Are you a bachelor student at a Faculty of Physics in Romania?
- Are you interested in research topics related to high-energy physics?
- Have you already completed 2 years of study?
- Can you easily communicate in English?
- Do you want to learn more about elementary particle physics and about high energy experiments at CERN?

If you answered yes to all of these questions, you have a chance to attend the first programme dedicated to Romanian bachelor students:

### „Romanian Students Internship Programme 2023 (SIP – RO)”,

taking place at [CERN](https://cern.ch) (Geneva, Switzerland) from 19 November 2023 until 2 December 2023.

- **How do you apply?**

If you fulfill all the above requirements, please access the dedicated webpage: <https://indico.cern.ch/event/1337923/>, click on the [Registration link](#), and fill in all the fields of the form by the 27th of October 2023.

Prepare and upload your CV and a motivation letter in English (including no more than 500 words), where you should explain why you want to attend the programme and why you should be selected.

You will also need one or two recommendation letters from your lecturers or a researcher, where they should also include their contact information. Since the application selection commission will be an international one, it would be helpful if the recommendation letters would be in English, but this is not mandatory.

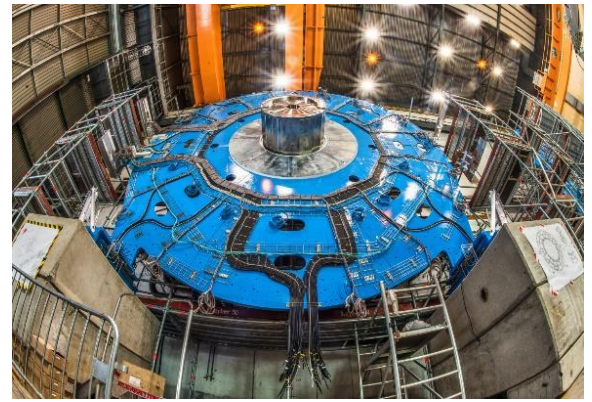

The preliminary results will be announced within few days. The students will be selected by a committee including researchers and teachers from Romania and CERN.

The ideal candidate must be highly motivated and propose very good arguments to participate in the programme. Priority will be given to candidates that have started a collaboration with members of the Romanian groups participating in experiments at CERN.

<https://indico.cern.ch/event/1337923/>  
<https://hssip.web.cern.ch/home-page>

The selected students need to attend the programme for its entire duration. If any of the students will no longer be able to attend, he/she will be replaced with a student on the waiting list.

- **Additional information**

No participation fee applies, the programme is free of charge. The lodging (at CERN Hostel) and meals cost for all 10 selected students (with the possibility to extend it up to 12 students depending on the cost) is fully covered as part of the national project “Discover the Universe with Romania @CERN (DUROCERN)”. Transportation costs will also be covered from Bucharest to Geneva within the limits of a maximum budget. In certain situations, transportation costs from the student’s place of residence to Bucharest and return may be covered.

If you are selected, you need to make sure you have a valid identification document and that you are in compliance with the entry conditions and regime of stay in Switzerland (<https://www.mae.ro/travel-conditions/3692#841>).

For additional details, you can contact us at [edu@fizica.unibuc.ro](mailto:edu@fizica.unibuc.ro).

We are looking forward to receiving your applications!

For the organizers,

Roxana Zus
